

Mohamed Belgacem

IT & Business Analytics Student | Aspiring DevOps / Full-Stack Developer

✉ mbhansoo05@gmail.com ☎ +216 97 158 090 📍 Tunis, Tunisia 🌐 h4nsoo 🔄 h4nsoo

📄 SUMMARY

Results-driven and detail-oriented IT & Business Analytics student with hands-on experience in **Full-Stack Development** and **DevOps**. Proven ability to build scalable web applications and lead cross-functional teams.

🎓 EDUCATION

Information Technology, Business Analytics

Tunis Business School

09/2023 – Present

Tunis

- Relevant coursework covers Data structures, Web development, Web services and APIs, databases, advanced programming, networking, AI, systems design, and security.
- I bring a hybrid profile able to translate business needs into technical solutions.

Baccalaureate, Computer Science

Ibn Sina High School

09/2022 – 06/2023

Kebili

- With **Highest Honors**

📁 PROJECTS

Merit Club TBS Website

Merit Club TBS

- Built and deployed a full-stack web app using **Next.js** to manage club operations for over 80 users and serve as its public image, managed to increase engagement by 40%.
- Implemented a JWT-based authentication and authorization system, including a secure password recovery flow with email-based one-time passwords (OTP) as a second authentication factor.
- Implemented a **real-time notification and task assignment system**, enabling instant user updates and event-driven interactions.

Manga Reader Web Application

Personal Project

- Developed a React-based manga reader integrating MangaDex public API for real-time chapter streaming with **sub-second load times** through optimized state management.

Aalemni Gym

Personal Project

- Developed a Go-based **gym social platform** (Fiber framework) combining AI-powered fitness intelligence, social networking (friends, leaderboards), and gamification logic.
- Integrated **computer-vision-based machine recognition** from uploaded images via the Gemini API.
- Improved performance and scalability through **Redis-based** caching, paginated list endpoints, and request rate limiting
- Designed a normalized strength ranking model using the Epley 1RM, adjusted through **allometric scaling** and **Z-score standardization** to ensure fair cross-user comparison.
- Containerized the application using **Docker** and implemented CI/CD pipelines with **GitHub Actions** for automated testing and deployment.
- Added structured logging and **Prometheus** monitoring by exposing a /metrics endpoint to enable observability and system health tracking.

🔧 TECHNICAL SKILLS

- **Languages:** C, Java, Python, TypeScript, Go
- **Web Technologies:** HTML5, CSS3, React.js, Next.js, Node/Express.js, Fiber, FastAPI, Flask, SQL/NoSQL Databases
- **Databases:** MySQL, PostgreSQL, SQLite, MongoDB, Cassandra
- **Tools and Others:** Docker, Postman, Github Actions, Linux, Git

💡 EXTRACURRICULARS

Merit Club TBS

10/2024 – Present

Marketing Team Member → Marketing Team Leader

- Planning and running the club's online presence.
- Delivered IT-focused mentorship sessions for 30+ members.
- Specialized in short-form video content that generated over 10k views, boosting club visibility.
